Topic 17 – Immune System Chapter 35 pages 1009-1033

Power Notes

SC.912.L.14.52 – Immune System

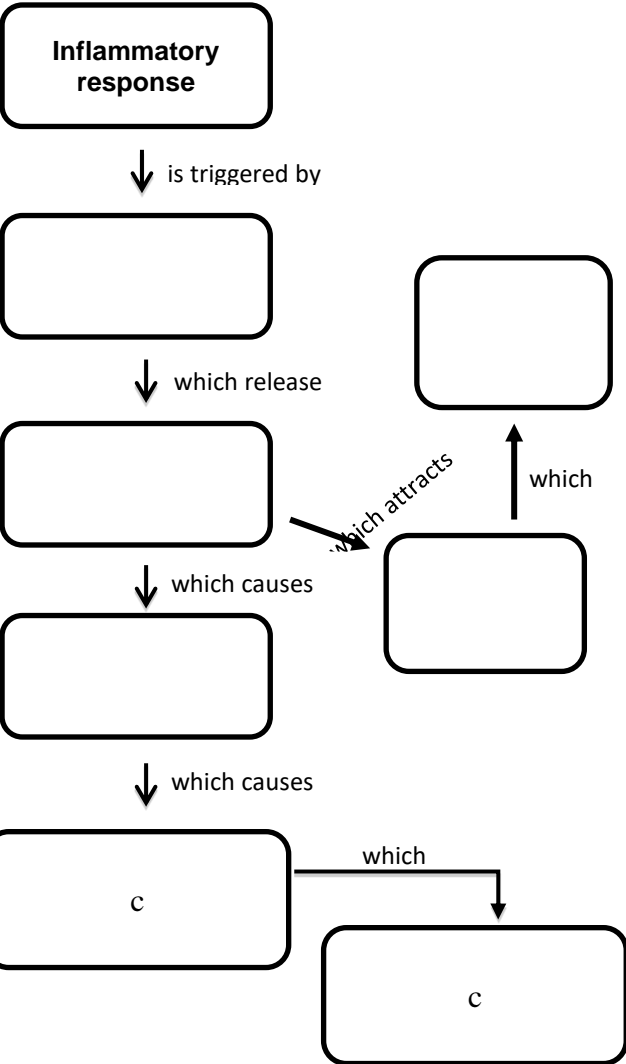

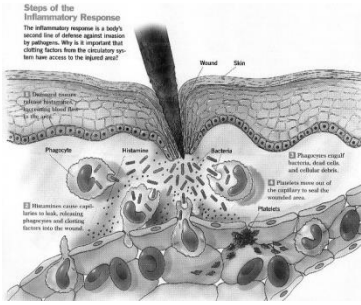

MAIN IDEA: The immune system has several defenses against pathogens and foreign cells.

Nonspecific Defense	Specific Defense
Examples	Examples

MAIN IDEA: Many body systems and structures protect you from pathogens.

Part	How It Contributes to the Immune System
Circulatory system	
Skin	
Mucous membrane	
Body secretions	
Phagocyte (macrophage)	
Fever	
T cell	
B cell	
Antibody	
Interferon	

MAIN IDEA: Many body systems work to produce an inflammatory response.

MAIN IDEA: Cells of the immune system produce specific responses.
